Description

Laser Storm

Drone-mounted

Portable

Technology

Multi-beam Laser Storm device for hazardless visual disruption, projects hundreds of moving laser beams to interfere with line-of-sight vision.

- **Safer Non-lethal:** Lower power beams
- **Wide area coverage:** Beam shower & movement cover area
- **Eye-Safe:** Each beam is below ANSI Z136.1 Maximum Permissible Exposure (MPE) → no accidental eye damage
- **No need for precise targeting**
- **No Countermeasure:** Multiple colors → no protective eyewear
- Low Size, Weight and Power (**low SWaP**) → portable/mobile platforms
- **Customizable:** Variable range, laser intensity & coverage

Currently TRL 4.

Requirement / Benefits

Non-lethal area denial / Non-Lethal Weapon in mixed environments

- USCENTCOM (vehicle Stop, Anti-personnel, with reversibility as a key attribute)
- USEUCOM: Improved non-kinetic options for contested environments

Team with 20yr USAF/AFRL R&D on Flash & Laser eye protection

REQUIREMENT:

- Customer discovery within Air Force / AFSOC / Security Forces / SOCOM
- SBIR Phase II: operational prototype, demonstration and field testing
- Phase III: integrate with specific mobile platforms in operational military environments
